Summary

AI application / LLM product engineer who ships agents, RAG, and MCP tooling as applied product work, not research ML. Builds end-to-end systems (schema, API, UI, agent doors) and client-facing LLM features with retrieval-first patterns across Kaeru, log.exe, and production client surfaces.

Skills

Languages: TypeScript, JavaScript, Go, Rust, SQL, Shell

AI & LLM: MCP, Claude API, OpenAI API, RAG, vector embeddings, semantic search, multi-agent orchestration

Product stack: Next.js, Nuxt, Vue, React, Node.js, Bun, Hono, Tauri

Cloud & infra: Cloudflare (Workers, D1, R2, Pages), Vercel, GitHub Actions, microCMS

Work Experience

Jr. Frontend Developer | OSBR Sdn Bhd, Malaysia Apr 2025 - Present

- Designed and prototyped a travel-client AI/RAG conversational experience (emotion-aware UX, conversation flows, and frontend integration with a retrieval-backed chat surface); focused on design, mockups, and product integration rather than cloud infrastructure.
- Built an internal AI chatbot (Next.js) for the same client, extending a multi-year engagement covering microsites and a strategy hub.
- Built a Tauri (Rust) desktop AI companion with Claude chat, voice I/O, and bidirectional MCP (consumes MCP servers and exposes itself as one).
- Shipped Figma-to-code client sites on Nuxt, Vue, and Astro (microCMS); recovered a production Vercel outage from a dependency mismatch.

Frontend Developer | Todak Digitech Sdn Bhd, Malaysia Jan 2024 - Apr 2025

- Led end-to-end responsive web delivery (UI, front-end, content strategy) with API integrations; tested across Laravel, React, and Flutter.

Projects

Kaeru App | AI workspace for non-developers ↗ | Tauri, Rust, React, TypeScript 2026 - Present

- Shipping Kaeru App: Tauri desktop shell (real terminal, live preview, plain-language source control), bilingual EN/JA UI, and accessibility polish, with high-throughput multi-repo ownership across Kaeru, log.exe, and concurrent client frontend work.

log.exe | Agentic CMS / engineering SoT ↗ | Next.js, Cloudflare Workers, D1, R2, MCP 2026 - Present

- Built a personal Agentic CMS with REST, MCP, CLI, and Ask/RAG doors on one D1+R2 schema so humans and agents share the same facts.

Canopy | Multi-agent orchestration viewer ↗ | TypeScript, Next.js, Tailwind, Bun 2026

- Built a Next.js + SSE viewer where AI agents debate in an isometric scene and a human approves; reads agent defs from shared config.

Education

Bachelor of Accountancy (Honours), First Class | Universiti Teknologi MARA 2018 - 2021

Certified Associate in Front-End Development ↗ | TalentLabs Academy Aug 2023

Foundation Certificate in Software Engineering ↗ | TalentLabs Academy May 2022

Certifications

- AWS Certified Solutions Architect - Associate ↗ | Amazon Web Services
