## Summary

AI application engineer who ships LLM-powered assistants, RAG workflows, and agent tooling for real business surfaces—not research ML. Builds end-to-end product paths (schema, API, UI, agent doors) in TypeScript on Cloudflare and desktop (Kaeru, log.exe, Canopy), with retrieval-first patterns and a clear appetite to deepen Python for enterprise AI/data workflows.

## Skills

**Languages:** TypeScript, JavaScript, Go, Rust, SQL, Shell (Python: learning)

**AI applications:** MCP, Claude API, OpenAI API, RAG, vector embeddings, semantic search, prompt patterns, multi-agent orchestration

**Product stack:** Next.js, Nuxt, Vue, React, Node.js, Bun, Hono, Tauri

**Cloud & delivery:** Cloudflare (Workers, D1, R2, Pages), Vercel, GitHub Actions, microCMS, APIs, Git

## Work Experience

**Jr. Frontend Developer** | OSBR Sdn Bhd, Malaysia Apr 2025 - Present

- Designed and prototyped a travel-client AI/RAG conversational experience (flows, mockups, and frontend integration with a retrieval-backed chat surface)—product integration focus, not cloud infrastructure.
- Built an internal Next.js AI chatbot for the same long-running client, connecting product surfaces to LLM-assisted workflows.
- Built a Tauri (Rust) desktop AI companion with Claude chat, voice I/O, and bidirectional MCP (consumes MCP servers and exposes itself as one).
- Shipped Figma-to-code client sites on Nuxt, Vue, and Astro (microCMS); recovered a production Vercel outage from a dependency mismatch.

**Frontend Developer** | Todak Digitech Sdn Bhd, Malaysia Jan 2024 - Apr 2025

- Led end-to-end responsive web delivery (UI, front-end, content strategy) with API integrations; validated flows across Laravel, React, and Flutter.

## Projects

**Kaeru App** | **AI workspace for non-developers** ↗ | Tauri, Rust, React, TypeScript 2026 - Present

- Shipping Kaeru App: Tauri desktop shell (real terminal, live preview, plain-language source control), bilingual EN/JA UI, and accessibility polish, with high-throughput multi-repo ownership across Kaeru, log.exe, and concurrent client frontend work.

**log.exe** | **Agentic CMS / engineering SoT** ↗ | Next.js, Cloudflare Workers, D1, R2, MCP 2026 - Present

- Built a personal Agentic CMS with REST, MCP, CLI, and Ask/RAG doors on one D1+R2 schema so humans and agents share the same facts.

**Canopy** | **Multi-agent orchestration viewer** ↗ | TypeScript, Next.js, Tailwind, Bun 2026

- Built a Next.js + SSE viewer where AI agents debate in an isometric scene and a human approves; reads agent defs from shared config.

## Education

**Bachelor of Accountancy (Honours), First Class** | Universiti Teknologi MARA 2018 - 2021

**Certified Associate in Front-End Development** ↗ | TalentLabs Academy Aug 2023

**Foundation Certificate in Software Engineering** ↗ | TalentLabs Academy May 2022

## Certifications

- AWS Certified Solutions Architect - Associate ↗ | Amazon Web Services
